NIGHT

Night Cards

Lights and fog signals for vessels seen at night

27 Cards

1 Towing

NIGHT

SITUATION
a) P.D. vessel towing, tow length > 200 m., underway seen from Starboard side. b) vessel object towed, tow length > 200 m., seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed. a) Two short blasts, alter course to port and pass round stem of last vessel or object towed.

LIGHTS
a) i) Masthead its forward and aft. ii) Side its and stern light. iii) Length < 50 m - aft masthead it not compulsory. iv) Two additional masthead its in vertical line with forward or aft masthead it. v) Yellow towing it above stern it. b) Side its an stern it or adequately illuminated.

FOG SIGNALS
a) One prolonged and two short blasts. b) Last vessel towed, if manned - one prolonged and three short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

2 Towing

NIGHT

SITUATION
a) P.D. vessel towing, tow length > 200 m., underway seen from port side. b) vessel object towed, tow length > 200 m seen from port side.

ACTION -- GIVE WAY
One short blast, alter course to Starboard and pass round stem of last vessel or object towed

LIGHTS
a) i) Masthead its forward and aft. ii) Side its and stern light. iii) Length < 50 m - aft masthead it not compulsory. iv) Two additional masthead its in vertical line with forward or aft masthead it. v) Yellow towing it above stern it. b) Side its an stern it or adequately illuminated.

FOG SIGNALS
a) One prolonged and two short blasts. b) Last vessel towed, if manned - one prolonged and three short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

3 Towing

NIGHT

SITUATION
Lost of inconspicuous, partly submerged vessel or object towed, tow length < 200 m see from Starboard side.

ACTION -- GIVE WAY
Two short blasts, alter course to port.

LIGHTS
a) Breadth < 25 m - all round white its forward and aft. b) Breadth > 25 m - Additional - all round white its at extremeties of breadth. c) Length > 100 m - Additional - all round white its in between above its at horizontal intervals < 100 m. d) Dracones - Forward it not compulsory.

FOG SIGNALS
Nil

WHY?
This towing vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

4 Towing

NIGHT

SITUATION
Lost of inconspicuous, partly submerged vessel or object towed, tow length > 200 m see from Starboard side.

ACTION -- GIVE WAY
alter course away from tug giving appropriate singal.

LIGHTS
a) Breadth < 25 m - all round white its forward and aft. b) Breadth > 25 m - Additional - all round white its at extremeties of breadth. c) Length > 100 m - Additional - all round white its in between above it

FOG SIGNALS

WHY?
You see this towing vessel on your starboard side. Alter course to starboard to pass around her stern.

5 Sailing

NIGHT

SITUATION
S.V. underway, also propelled by machinery, seen from Starboard side.

ACTION -- GIVE WAY
Manitain course and speed.

LIGHTS
a) Masthead its forward and aft. b) Side its and stern light. c) Length < 50 m - aft masthead it not compulsory.

FOG SIGNALS
a) Making way - one prolonged blast. b) Stopped - two prolonged blasts with two secs. interval in between

WHY?
You see this sailing vessel on your starboard side. Alter course to starboard to pass around her stern.

6 Sailing

NIGHT

SITUATION
S.V. underway, also propelled by machinery, seen from port side.

ACTION -- GIVE WAY
One short blast, alter course to Starboard.

LIGHTS
a) Masthead its forward and aft. b) Side its and stern light. c) Length < 50 m - aft masthead it not compulsory.

FOG SIGNALS
a) Making way - one prolonged blast. b) Stopped - two prolonged blasts with two secs. interval in between

WHY?
You see this sailing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

7 Fishing

NIGHT

SITUATION
vessel fishing with nets or lines extending < 150 m horizontally from vessel, underway or at anchor, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts, alter course to port.

LIGHTS
a) i) All round red over white its in vertical line. ii)Making way - side lts and stern lt. b)i) All round green over white lts in vertical line. ii)Masthead lt abaft of and higher than green lt. iii)Making way - side lts and stern it. iv)Length < 50 m - masthead lt not compulsory.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This fishing vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

9 Fishing

NIGHT

SITUATION
vessel fishing with nets or lines extending > 150 m horizontally from vessel, underway or at anchor, seen end on from ahead or astern.

ACTION -- GIVE WAY
Two short blasts, alter course to port away from gear.

LIGHTS
a) All round red over white its in vertical line. b) Making way - side lts and stern lt. c) All round white lt in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this fishing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

11 NUC

NIGHT

SITUATION
vessel NUC, underway, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts, alter course to port.

LIGHTS
a) Two all round red lts in vertical line. b) Making way - side lts and stern lt.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

12 Mine Clearance

NIGHT

SITUATION
vessel RAM, except mine clearance vessel, underway, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts, alter course to port.

LIGHTS
a) All round, white and red lts in vertical line. b) Making way - masthead lts forward and aft, side lts and stern lt. c) Length < 50 m - aft masthead lt not compulsory.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

13 Mine Clearance

NIGHT

SITUATION
vessel RAM, except mine clearance vessel, at anchor, seen from port side.

ACTION -- GIVE WAY
One short blasts, alter course to Starboard.

LIGHTS
a) All round, white and red lts in vertical line. b) All round white lts forward and deck. c) Working lts to illuminate deck. d) Length < 100 m - working lts not compulsory. e) Length < 50 m - working lts and white lt at stern not compulsory, and forward white lt placed where it can best be seen

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

14 Towing (RAM)

NIGHT

SITUATION
P.D. vessel towing, RAM, tow length > 200 m, underway, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts, alter course to port and pass round stern of last vessel or object towed.

LIGHTS
a) Masthead lts forward and aft. b) Side lts and stern lt. c) Length < 50 m - aft masthead lt not compulsory. d) Two additional masthead lts in vertical line with forward or aft masthead lts. e) Yellow towing it above stern it. f) All round, white and red lts in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This towing vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

15 Dredger

NIGHT

SITUATION
Dredge, RAM, underway or at anchor, seen end on from ahead or astern.

ACTION -- GIVE WAY
Two short blasts, alter course to port towards safe side.

LIGHTS
a) All round red, white and red lts in vertical line. b) Two All round red lts vertical line on obstruction side. c) Two All round green lts vertical line on safe side. d) Making way - i) Masthead lts forward and aft, side lts and stern lt. ii)Length < 50 m - aft masthead lt not compulsory.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

16 Diving Ops

NIGHT

SITUATION
Small vessel engaged in diving operations, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts, alter course to port.

LIGHTS
All round red, white and red lts in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

17 Mine Clearance

NIGHT

SITUATION
vessel engaged in mine clearance operation, underway, seen end on blast, alter course to Starboard or astern.

ACTION -- GIVE WAY
One short blast, alter course to Starboard and pass > 1000 m clear of vessel.

LIGHTS
a) Three all round green lts - one at foremast head and one at each of fore yard. b) Masthead lts forward and aft. side lts and stern lt. c) Length < 50 m - aft masthead lt not compulsory.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

18 Mine Clearance

NIGHT

SITUATION
vessel engaged in mine clearance operation, at anchor, seen from port side.

ACTION -- GIVE WAY
One short blast, alter course to Starboard and pass > 1000 m clear of vessel.

LIGHTS
a) Three all round green lts - one at foremast head and one at each of fore yard. b) All round white lts forward and at stern. c) Working lts to illuminate deck. d) Length < 100 m - working lts not compulsory. e) Length < 50 m - working lts and white lt at stern not compulsory. and forward white lt placed where it can best bee seen.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

19 CBD

NIGHT

SITUATION
P.D. vessel constrained by draught, underway, seen from Starboard side.

ACTION -- GIVE WAY
One short blast, alter course to Starboard and pass round her stern.

LIGHTS
a) Three all round red lts in vertical line. b) Masthead lights forward and aft, side lts and stern lt. c) Length < 50 m - at Masthead light not compulsory.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this power-driven vessel on your starboard side. Alter course to starboard to pass around her stern.

20 Pilot

NIGHT

SITUATION
Pilot vessel underway, seen from Starboard side.

ACTION -- STAND ON
Maintain course speed.

LIGHTS
a) All round white over red lts in vertical line at or near masthead. b) Side lts and stern lt.

FOG SIGNALS
a) Making way - one prolonged blast. b) Stopped - two prolonged blasts with two secs. interval in between. c) Optional - four short blasts.

WHY?
You see this pilot vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

21 Pilot

NIGHT

SITUATION
Pilot vessel underway, seen from port side.

ACTION -- GIVE WAY
One short blast, alter course to Starboard.

LIGHTS
a) All round white over red lts in vertical line at or near masthead. b) Side lts and stern lt.

FOG SIGNALS
a) Making way - one prolonged blast. b) Stopped - two prolonged blasts with two secs. interval in between. c) Optional - four short blasts.

WHY?
You see this pilot vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

22 Pilot

NIGHT

SITUATION
Pilot vessel at anchor, seen from Starboard side.

ACTION -- GIVE WAY
Two short blast, alter course to port.

LIGHTS
a) All round white over red lts in vertical line at or near masthead. b) All round white lts forward and at stern. c) Working lts to illuminate deck. d) Length < 100 m - working lts not compulsory. e) Length < 50 m - working lts and white lt at stern not compulsory, and forward white lt placed where it can best seen.

FOG SIGNALS
a) Length < 100 m - rapid ringing of bell for 5 secs. b) Length > 100 m - rapid ringing of bell for five secs and rapid ringing of gong aft for five secs. c) Optional - four short blasts.

WHY?
This pilot vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

23 Anchored

NIGHT

SITUATION
vessel at anchor, seen from port side.

ACTION -- GIVE WAY
One short blast, alter course to Starboard.

LIGHTS
a) All round white lts forward and at stern. b) Working lts to illuminate deck. c) Length < 100 m - working lts not compulsory. d) Length < 50 m - working lts and white lt at stern not compulsory, and forward white lt placed where it can best seen.

FOG SIGNALS
a) Length < 100 m - rapid ringing of bell for 5 secs. b) Length > 100 m - rapid ringing of bell for five secs and rapid ringing of gong aft for five secs. c) Optional - one short, one prolonged,one short blasts.

WHY?
You see this anchored vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

24 Aground

NIGHT

SITUATION
vessel aground, seen from Starboard side.

ACTION -- GIVE WAY
One short blast, alter course to Starboard. reverse course and inform Master.

LIGHTS
a) Two All round red lts in vertical line. b) All round white lts forward and at stern. c) Length < 50 m - white light at stern not compulsory. and forward white Light placed where it can best be seen.

FOG SIGNALS
a) Length < 100 m - rapid ringing of bell for five secs. b) Length > 100 m - rapid ringing of bell for five secs and rapid ringing of gong aft for five secs. c) Three separate and distinct strokes on bell before and after ringing of bell d) Optional - appropriate whistle signal (two short and one prolonged blasts).

WHY?
This is a vessel aground. Immediately alter course away, reverse course if needed, and inform the Master. An aground vessel cannot manoeuvre.

25 Trawler

NIGHT

SITUATION
Trawler, underway, shooting nets, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts, alter course to port.

LIGHTS
a) All round green over white lts in vertical line. b) Masthead lt abaft of and higher than green lt. c) Making way - side lts and stern lt. d) Length < 50 m - masthead lt not compulsory. e) Two all round white lights in vertical line at tower level than green and white lights.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

26 Trawler

NIGHT

SITUATION
Trawler, underway or at anchor hauling nets, seen from port side.

ACTION -- GIVE WAY
One short blasts, alter course to Starboard.

LIGHTS
a) All round green over white lts in vertical line. b) Masthead light abaft of and higher than green light. c) Making way - side lts and stern lt. d) Length < 50 m - masthead light not compulsory. e) All round white over red lights in vertical line at tower level than green and white lights.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

28 Trawler

NIGHT

SITUATION
Two trawlers engaged in pair trawling, underway, shooting nets, seen end on from ahead or astern.

ACTION -- GIVE WAY
One short blasts, alter course to Starboard.

LIGHTS
a) All round green over white lts in vertical line. b) Masthead lt abaft of and higher than green lt. c) Making way - side lts and stern lt. d) Length < 50 m - masthead lt not compulsory. e)i) Two all round white lts in vertical line at tower level than green and white lts. ii)Search lt directed forward and in direction of other trawler.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

29 Trawler

NIGHT

SITUATION
Two trawlers engaged in pair trawling, underway or at anchor, hauling nets, seen end on from ahead or astern.

ACTION -- GIVE WAY
One short blasts, alter course to Starboard.

LIGHTS
a) All round green over white lts in vertical line. b) Masthead light abaft of and higher than green light. c) Making way - side lts and stern lt. d) Length < 50 m - masthead lt not compulsory. e) i) All round white over red lights in vertical line at tower level than green and white lights. ii) Search lt directed forward and in direction of other trawler.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

30 Trawler

NIGHT

SITUATION
Two trawlers engaged in pair trawling, stopped or at anchor, nets fast on obstruction, seen end on from ahead or astern.

ACTION -- GIVE WAY
One short blasts, alter course to Starboard, and pass well clear

LIGHTS
a) All round green over white lts in vertical line. b) Masthead light abaft of and higher than green light. c) Length < 50 m - masthead lt not compulsory. d) i) Two all round white lts in vertical line at lower level than green and white lts. ii)Search lt directed forward and in direction of other trawler.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

DAY

Day Cards

Day signals and fog signals for vessels seen during daylight

225 Cards

1 Power Driven

DAY

SITUATION
P.D. vessel less than 50 m underway seen end on

ACTION -- GIVE WAY
One short blast, alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
Making way - One prolonged blast Stopped - Two prolonged blasts with 2 secs. interval in between.

WHY?
You see this power-driven vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

2 Power Driven

DAY

SITUATION
P.D. vessel less than 50 m underway seen From Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
Making way - One prolonged blast Stopped - Two prolonged blasts with 2 secs interval in between.

WHY?
You see this power-driven vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

3 Power Driven

DAY

SITUATION
P.D. vessel less than 50 m underway seen From port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
Making way - One prolonged blast Stopped - Two prolonged blasts with 2 secs interval in between.

WHY?
You see this power-driven vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

4 Pushing

DAY

SITUATION
P.D. vessel seen end on - a) Probably 50 m. or more underway. b) less than 50 m. towing or pushing underway two 200 m. or less.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
a) Making way - One prolonged blast. Stopped - Two prolonged blasts with 2 secs. interval in between.

WHY?
You see this vessel pushing ahead end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

5 Power Driven

DAY

SITUATION
P.D. vessel less than 50 m or more underway seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
Making way - One prolonged blast Snopped - Two prolonged blasts with 2 secs intervat in between.

WHY?
You see this power-driven vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

6 Power Driven

DAY

SITUATION
P.D. vessel less than 50 m or more underway seen from Starboard side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
Making way - One prolonged blast Snopped - Two prolonged blasts with 2 secs intervat in between.

WHY?
You see this power-driven vessel on your starboard side. Alter course to starboard to pass around her stern.

7 Anchored

DAY

SITUATION
a) vessel probably 50 m. or more but less than 100 m. at anchor, seen from ahead or astern. b) P.D. vessel probably 50 m. or more underway seen end on, out of range of side lignts. c) P.D. vessel towing or pushing less than 50 m. underway, tow 200 m. or less, out of range of side lights.

ACTION -- GIVE WAY
a) & b) One short blast alter course to Starboard. c) As per side light when sighted.

DAY SIGNALS
a) A bali in fore part. b) & c) No day signal.

FOG SIGNALS
As per possibility.

WHY?
You see this vessel pushing ahead end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

8 Anchored

DAY

SITUATION
a) vessel probably 50 m. or more but less than 100 m. at anchor, seen from port side. b) P.D. vessel probably 50 m. or more underway seen from Starboard side out of range of side lights.

ACTION -- STAND ON
a) One short blast alter course to Starboard. b) Maintain course and speed.

DAY SIGNALS
a) A bali in fore part. b) No day signal.

FOG SIGNALS
a) Rapid ringing of bell for 5 secs. Additional - Short. prolonged and short blasts may be sounded. b) Making way - One prolonged blast. Stopped - Two prolonged blasts with 2 sects. interval in between.

WHY?
You see this anchored vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

9 Anchored

DAY

SITUATION
a) P.D. vessel or S.V. underway seen from astern. b) P.D. vessel less than 50 m. underway out of range of side lights. c) All - round light of : i)vessel less than 50 m. at anchor. ii) vessel under oars. iii)P.D. vessel less than 7 m., speed not exceeding 7 knots. iv)P.D. vessel less than 12m., out of range side lights. v) Sailing vessel less than 7 m.

ACTION -- STAND ON
a) One short blast alter course Starboard. b) As per side light when sighted. c) i), ii) & v) One short blast alter course to Starboard. iii) Port blow- Maintain course and speed. Right ahead & Starboard bow- One short blast alter course to Starboard. iv) As per side light when sighted.

DAY SIGNALS
Anchored vessel - One ball in fore part. Others - No day signal.

FOG SIGNALS
As per possibility.

WHY?
You are the stand-on vessel. Maintain your course and speed as required by the Rules.

10 Air-cushion

DAY

SITUATION
Air - cushion vessel less than 50 m. in non - displacement mode underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
one prolonged blast. (vessel assumed to be making way)

WHY?
You see this air-cushion vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

11 Air-cushion

DAY

SITUATION
Air - cushion vessel less than 50 m. in non - displacement mode underway seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
one prolonged blast. (vessel assumed to be making way)

WHY?
You see this air-cushion vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

12 Air-cushion

DAY

SITUATION
Air - cushion vessel less than 50 m. in non - displacement mode underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
one prolonged blast. (vessel assumed to be making way)

WHY?
You see this air-cushion vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

13 Air-cushion

DAY

SITUATION
a) Air - cushion vessel in non - displacement mode underway seen from astern. b) Air - cushion vessel less than 12 m. in non - displacement mode underway out of range of side lights.

ACTION -- GIVE WAY
a) One short blast alter course to Starboard. b) As per side light when sighted.

DAY SIGNALS
No day signal.

FOG SIGNALS
one prolonged blast. (vessel assumed to be making way.)

WHY?
You are overtaking this air-cushion vessel from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

14 Air-cushion

DAY

SITUATION
a) Air - cushion vessel in non - displacement mode underway seen from astern. b) Air - cushion vessel less than 12 m. in non - displacement mode underway out of range of side lights. seen from Starboard. side.

ACTION -- STAND ON
a) One short blast alter course to Starboard. b) Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
one prolonged blast. (vessel assumed to be making way.)

WHY?
You see this air-cushion vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

15 Air-cushion

DAY

SITUATION
a) Air - cushion vessel in non - displacement mode underway seen from astern. b) Air - cushion vessel less than 12 m. in non - displacement mode underway out of range of side lights. seen from port side.

ACTION -- GIVE WAY
a) Two short blast alter course to port. b) One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
one prolonged blast. (vessel assumed to be making way.)

WHY?
You see this air-cushion vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

16 Power Driven

DAY

SITUATION
a) P.D. vessel less than 20 m. underway, seen end on. b) P.D. vessel less than 12 m. underway, mast head it. displaced from centre line, line, seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
Making way - One prolonged blast. Stopped - Two prolonged blasts with 2 secs. interval in between.

WHY?
You see this power-driven vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

17 Towing

DAY

SITUATION
P.D. vessel towing less than 50 m underway tow 200 m. or less from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

18 Towing

DAY

SITUATION
P.D. vessel towing less than 50 m underway tow 200 m. or less from port side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

19 Towing

DAY

SITUATION
P.D. vessel towing underway seen end on - a)less than 50 m, tow exceeds 200 m. b)probably 50 m or more, tow 200 m or less.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
a) One Diamond b)No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

20 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m or more underway tow 200 m or less from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your starboard side. Alter course to starboard to pass around her stern.

21 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m or more underway tow 200 m or less, seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your starboard side. Alter course to starboard to pass around her stern.

22 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m or more underway tow 200 m or less, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

23 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m or more underway tow 200 m or less, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

24 Towing

DAY

SITUATION
P.D. vessel towing probably less than 50 m underway tow exceeds 200 m. seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
One diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

25 Towing

DAY

SITUATION
P.D. vessel towing probably less than 50 m underway tow exceeds 200 m. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

26 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m or more underway, tow exceeds 200 m. seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

27 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m or more underway tow exceeds 200 m., seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
One diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

28 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m or more underway tow exceeds 200 m. seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
One diamond.

FOG SIGNALS
One prolonged and two short blasts. There are three white lights and not two

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

29 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow exceeds 200 m. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

30 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow exceeds 200 m. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

31 Towing

DAY

SITUATION
P.D. vessel towing underway seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond if tow exceeds 200 m.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this towing vessel from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

32 Towing

DAY

SITUATION
P.D. vessel towing less than 50 m. underway with tow 200 m. or less seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

33 Towing

DAY

SITUATION
P.D. vessel towing less than 50 m. underway with tow 200 m. or less seen from port side

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

34 Towing

DAY

SITUATION
P.D. vessel towing less than 50 m. underway with tow exceeding 200 m. seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
One diamond each on towing and towed vessels

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

35 Towing

DAY

SITUATION
P.D. vessel towing less than 50 m. underway with tow exceeding 200 m. or seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond each on towing and towed vessels

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

36 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow 200 m. or less seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts. Red light on the top is the white light

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

37 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow 200 m. or less seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

38 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow 200 m. or less seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts. Green light on the top is the white light

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

39 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow 200 m. or less seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

40 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow exceeding 200 m. seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
One diamond each on towing and towed vessels

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

41 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow exceeding 200 m. seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
One diamond each on towing and towed vessels

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

42 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow exceeding 200 m. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond each on towing and towed vessels

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

43 Towing

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway with tow exceeding 200 m. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
One diamond each on towing and towed vessels

FOG SIGNALS
Towing vessel - One prolonged and two short blasts. Towed vessel - One prolonged and three short blasts.

WHY?
You see this towing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

44 Pushing

DAY

SITUATION
P.D. vessel pushing ahead less than 50 m. underway seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel pushing ahead on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

45 Pushing

DAY

SITUATION
P.D. vessel pushing ahead less than 50 m. underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel pushing ahead on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

46 Pushing

DAY

SITUATION
P.D. vessel pushing ahead probably 50 m. or more underway seen from Starboard side.

ACTION -- STAND ON
Maintain course and speed.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel pushing ahead on your starboard side. Under COLREGS you are the stand-on vessel -- maintain your course and speed.

48 Pushing

DAY

SITUATION
P.D. vessel pushing ahead probably 50 m. or more underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel pushing ahead on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

49 Pushing

DAY

SITUATION
P.D. vessel pushing ahead probably 50 m. or more underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel pushing ahead on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

50 Towing

DAY

SITUATION
P.D. vessel towing alongside less than 50 m. underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

51 Towing

DAY

SITUATION
P.D. vessel towing alongside Probably 50 m. or more underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this towing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

52 Towing

DAY

SITUATION
Inconspicuous partly submerged vessel or object or their combination towed, breadth less than 25 m., lenth 100 m. or less.

ACTION -- GIVE WAY
Action according to position of tug.

DAY SIGNALS
One diamond at or near aftermost extremity of last vessel or object. If tow exceeds 200 m., one additional diamond forward.

FOG SIGNALS
No fog signal.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this towing vessel.

54 Towing

DAY

SITUATION
Inconspicuous partly submerged vessel or object or their combination towed, length 200 m. or less.

ACTION -- GIVE WAY
Action according to position of tug.

DAY SIGNALS
One diamond at or near aftermost extremity of last vessel or object. If tow exceeds 200 m. one additional diamond forward.

FOG SIGNALS
No fog signal.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this towing vessel.

55 Sailing

DAY

SITUATION
S.V. underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this sailing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

56 Sailing

DAY

SITUATION
a) S.V. underway seen from Starboard side. b) vessel being towed seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
a) No day signal. b) If length of tow exceeds 200 m. a diamond.

FOG SIGNALS
a) One prolonged and two short blasts. b) One prolonged and three short blasts.

WHY?
This sailing vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

57 Sailing

DAY

SITUATION
a) S.V. underway seen from port side. b) vessel being towed seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
a) No day signal. b) If length of tow exceeds 200 m. a diamond.

FOG SIGNALS
a) One prolonged and two short blasts. b) One prolonged and three short blasts.

WHY?
You see this sailing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

58 Sailing

DAY

SITUATION
S.V. less than 20 m underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this sailing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

59 Sailing

DAY

SITUATION
S.V. probably 20 m or more underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this sailing vessel end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

60 Sailing

DAY

SITUATION
S.V. probably 20 m or more underway seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This sailing vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

61 Sailing

DAY

SITUATION
S.V. probably 20 m or more underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this sailing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

62 Sailing

DAY

SITUATION
S.V. probably 20 m or more underway seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This sailing vessel is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

63 Sailing

DAY

SITUATION
S.V. probably 20 m. or more underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this sailing vessel on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

64 Sailing

DAY

SITUATION
S.V. probably 20 m or more underway seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this sailing vessel from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

65 Sailing

DAY

SITUATION
S.V. probably 20 m or more underway seen from astern.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this sailing vessel from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

66 Sailing

DAY

SITUATION
S.V. probably 20 m or more underway seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
No day signal.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this sailing vessel from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

67 Trawler

DAY

SITUATION
Trawler less than 50 m. making way seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

68 Trawler

DAY

SITUATION
Trawler less than 50 m. making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts. Bottom side light is green light and not white light

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

69 Trawler

DAY

SITUATION
Trawler less than 50 m. making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts. 11..TTrraawwlleerr lleessss tthhaann 5500 mm.. mmaakkiinngg wwaayy sseeeenn ffrroomm ppoorrtt ssiiddee.. 22..OOnnee sshhoorrtt bbllaasstt aa//cc ttoo ssttbbdd.. 33..TTwwoo ccoonneess wwiittthh aappeexxeess ttooggeetthheerr iinn vveerrttiiccaall lliinnee.. 44..OOnnee pprroolloonnggeedd aanndd ttwwoo sshhoorrtt bbllaassttss..

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

70 Trawler

DAY

SITUATION
Trawler less than 50 m. making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

71 Trawler

DAY

SITUATION
Trawler less than 50 m. making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

72 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

73 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

74 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard .

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

75 Trawler

DAY

SITUATION
Trawler making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard .

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

76 Trawler

DAY

SITUATION
Trawler making way seen from astern.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

77 Trawler

DAY

SITUATION
Trawler making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

78 Trawler

DAY

SITUATION
Trawler underway but stopped or at anchor.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this trawler.

79 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

80 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

81 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

82 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending 150 m. or less, seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

83 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending 150 m. or less, seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

84 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending 150 m. or less, seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

85 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending 150 m. or less, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

86 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending 150 m. or less, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

87 Trawler

DAY

SITUATION
F.V. other than trawler a) making way, gear extending 150 m. or less, seen from astern. b) underway but stopped or at anchor, gear extending more than 150 m.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
a) Two cones with apexes together in vertical line. b) Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

88 Trawler

DAY

SITUATION
F.V. other than trawler a) making way, gear extending 150 m. or less, seen from astern. b) underway but stopped or at anchor, gear extending more than 150 m.

ACTION -- GIVE WAY
a) Two short blast alter course to port. b) One short blast alter course to Starboard.

DAY SIGNALS
a) Two cones with apexes together in vertical line. b) Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

89 Trawler

DAY

SITUATION
F.V. other than trawler - a) making way, gear extending 150 m. or less seen from astern. b) underway but stopped or at anchor, gear extending more than 150 m.

ACTION -- GIVE WAY
a) One short blast alter course to Starboard. b) Two short blast alter course to port.

DAY SIGNALS
a) Two cones with apexes together in vertical line. b) Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

90 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

91 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

92 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

93 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

94 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

95 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from astern.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

96 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from astern.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

97 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from astern.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear .

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

98 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

99 Trawler

DAY

SITUATION
F.V. other than trawler making way, gear extending more than 150 m., seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

100 Trawler

DAY

SITUATION
F.V. other than trawler underway but stopped or at anchor, gear extending 150 m. or less.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this trawler.

101 Trawler

DAY

SITUATION
Trawler less than 50 m. making way shooting nets seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

102 Trawler

DAY

SITUATION
Trawler less than 50 m. making way hauling nets seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

103 Trawler

DAY

SITUATION
Trawler underway but stopped or at anchor, hauling nets.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this trawler.

104 Trawler

DAY

SITUATION
Trawler underway but stopped or at anchor, nets fast on an obstruction.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this trawler.

105 Trawler

DAY

SITUATION
Trawler less than 50 m. making way shooting nets seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

106 Trawler

DAY

SITUATION
Trawler less than 50 m. making way hauling nets seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

107 Trawler

DAY

SITUATION
Trawler less than 50 m. making way shooting nets seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

108 Trawler

DAY

SITUATION
Trawler less than 50 m. making way hauling nets seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

109 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way shooting nets seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

110 Trawler

DAY

SITUATION
Trawler probaly 50 m. or more making way hauling nets seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

111 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, hauling nets, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

112 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, hauling nets, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

113 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, nets fast on an obstruction, seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

114 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way shooting nets seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

115 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way hauling nets seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

116 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, nets fast on an obstruction, seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

117 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way shooting nets seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

118 Trawler

DAY

SITUATION
Trawler probably 50 m. or more making way hauling nets seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

119 Trawler

DAY

SITUATION
Trawler probably 50 m. or more underway but stopped or at anchor, nets fast on an obstruction, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

120 Trawler

DAY

SITUATION
Trawler making way shooting nets seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

121 Trawler

DAY

SITUATION
Trawler making way hauling nets seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

122 Trawler

DAY

SITUATION
Trawler making way shooting nets seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

123 Trawler

DAY

SITUATION
Trawler making way hauling nets seen from astern.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

124 Trawler

DAY

SITUATION
Trawler making way shooting nets seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag Z.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

125 Trawler

DAY

SITUATION
Trawler making way hauling nets seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also flag G.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

126 Trawler

DAY

SITUATION
Two vessels each less than 50 m. pair trawling making way hauling nets seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Each vessel shows two cones with apexes together in vertical line. Also flags G & T.

FOG SIGNALS
Each vessel sounds one prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

127 Trawler

DAY

SITUATION
Two vessels each probably 50 m. or more pair trawling making way shooting nets, seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Each vessel shows two cones with apexes together in vertical line. Also flags Z & T.

FOG SIGNALS
Each vessel sounds one prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

128 Trawler

DAY

SITUATION
Two vessels each probably 50 m. or more pair trawling underway but stopped or at anchor, nets fast on an obstruction, seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Each vessel shows two cones with apexes together in vertical line. Also flag T.

FOG SIGNALS
Each vessel sounds one prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

129 Trawler

DAY

SITUATION
Two vessels pair trawling making way shooting nets seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Each vessel shows two cones with apexes together in vertical line. Also flags Z & T.

FOG SIGNALS
Each vessel sounds one prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

130 Trawler

DAY

SITUATION
Two vessels pair trawling underway but stopped or at anchor, nets fast on an obstruction.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Each vessel shows two cones with apexes together in vertical line. Also flag T.

FOG SIGNALS
Each vessel sounds one prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this trawler.

131 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or less making way seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

132 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or less making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blast alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

133 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or less making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

134 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending more than 150 m., making way seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

135 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending more than 150 m., making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This trawler is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

136 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending more than 150 m., making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this trawler on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

137 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or less making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

138 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or less making way seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

139 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or less making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

140 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending more than 150 m., making way seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

141 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending more than 150 m., making way seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

142 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or more making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this trawler from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

143 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. or less underway but stopped or at anchor.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this trawler.

144 Trawler

DAY

SITUATION
F.V. other than trawler using purse seine gear extending 150 m. underway but stopped or at anchor.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two cones with apexes together in vertical line. Also a cone with apex upwards in direction of gear.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this trawler.

145 NUC

DAY

SITUATION
N.U.C. vessel making seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two balls in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Not Under Command end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

146 NUC

DAY

SITUATION
N.U.C. vessel making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two balls in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Not Under Command is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

147 NUC

DAY

SITUATION
N.U.C. vessel making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Two balls in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Not Under Command is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

148 NUC

DAY

SITUATION
N.U.C. vessel making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two balls in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Not Under Command on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

149 NUC

DAY

SITUATION
N.U.C. vessel making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Two balls in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Not Under Command on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

150 NUC

DAY

SITUATION
a) Aground vessel less than 50 m. b) N.U.C. vessel making way seen from astern.

ACTION -- GIVE WAY
a) One short blast alter course to Starboard,reverse course inform master. b) One short blast alter course to Starboard.

DAY SIGNALS
a) Three balls in vertical line. b) Two balls in vertical line.

FOG SIGNALS
b) One prolonged and two short blasts. a) Three stokes on bell before and after rapid ringing of bell for 5 secs. Also may sound two short and one prolonged blasts.

WHY?
This is a vessel Not Under Command. Immediately alter course away, reverse course if needed, and inform the Master. An aground vessel cannot manoeuvre.

151 NUC

DAY

SITUATION
a) N.U.C. vessel making way seen from astern. b) Aground vessel less than 50 m.

ACTION -- GIVE WAY
a) One short blast alter course to Starboard. b) One short blast alter course to Starboard, reverse course inform master.

DAY SIGNALS
a) Two balls in vertical line. b) Three balls in vertical line.

FOG SIGNALS
a) One prolonged and two short blasts. b) Three stokes on bell before and after rapid ringing of bell for 5 secs. Also may sound short and one prolonged blasts.

WHY?
This is a vessel Not Under Command. Immediately alter course away, reverse course if needed, and inform the Master. An aground vessel cannot manoeuvre.

152 NUC

DAY

SITUATION
a) Aground vessel less than 50 m. b) N.U.C. vessel making way seen from astern.

ACTION -- GIVE WAY
a) Two short blast alter course to port. b) One short blast alter course to Starboard, reverse course and inform master.

DAY SIGNALS
a) Two balls in vertical line. b) Three balls in vertical line.

FOG SIGNALS
a) One prolonged and two short blasts. b) Three stokes on bell before and after rapid ringing of bell for 5 secs. Also may sound two short and one prolonged blasts.

WHY?
This is a vessel Not Under Command. Immediately alter course away, reverse course if needed, and inform the Master. An aground vessel cannot manoeuvre.

153 NUC

DAY

SITUATION
N.U.C. vessel underway but stopped.

ACTION -- GIVE WAY
One short blast alter course Starboard.

DAY SIGNALS
Two balls in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this vessel Not Under Command.

154 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. making way seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

155 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

156 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

157 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course in Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

158 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

159 Dredger

DAY

SITUATION
a) vessel R.A.M. or dredger / underwater operations without obstruction probably 50 m. or more making way seen end on. b) P.D. vessel towing less than 50 m. underway, tow 200 m. or less R.A.M. seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

160 Dredger

DAY

SITUATION
a) vessel R.A.M. or dredger / underwater operations without obstruction probably 50 m. or more making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

161 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction probably 50 m. or more making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

162 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. at anchor, or making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and if at anchor also a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this dredger from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

163 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. at anchor, or making way seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line and if at anchor also a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this dredger from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

164 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction less than 50 m. at anchor, or making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and if at anchor also a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this dredger from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

165 Dredger

DAY

SITUATION
vessel R.A.M. or dredger / underwater operations without obstruction probably 50 m. or more but less than 100 m. at anchor, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

166 Towing (RAM)

DAY

SITUATION
P.D. vessel towing less than 50 m. underway tow 200 m. or less R.A.M. seen from Starboard. side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Restricted in Ability to Manoeuvre is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

167 Towing (RAM)

DAY

SITUATION
P.D. vessel towing less than 50 m. underway tow 200 m. or less R.A.M. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Restricted in Ability to Manoeuvre on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

168 Towing (RAM)

DAY

SITUATION
P.D. vessel towing underway R.A.M. seen on, a) less than 50 m. tow exceeds 200 m. b) probably 50 m or more, tow 200 m or less.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and if tow exceeds 200 m. also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this vessel Restricted in Ability to Manoeuvre.

169 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow 200 m. or less R.A.M. seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Restricted in Ability to Manoeuvre is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

170 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow 200 m. or less R.A.M. seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Restricted in Ability to Manoeuvre is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

171 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow 200 m. or less R.A.M. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Restricted in Ability to Manoeuvre on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

172 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow 200 m. or less R.A.M. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Restricted in Ability to Manoeuvre on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

173 Towing (RAM)

DAY

SITUATION
P.D. vessel towing less than 50 m. underway tow exceeds 200 m. or less R.A.M. seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line and also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Restricted in Ability to Manoeuvre is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

174 Towing (RAM)

DAY

SITUATION
P.D. vessel towing less than 50 m. underway tow exceeds 200 m. or less R.A.M. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Restricted in Ability to Manoeuvre on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

175 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow exceeds 200 m. R.A.M. seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Restricted in Ability to Manoeuvre end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

176 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow exceeds 200 m. R.A.M. seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line and also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Restricted in Ability to Manoeuvre is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

177 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow exceeds 200 m, R.A.M. seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line and also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This vessel Restricted in Ability to Manoeuvre is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

178 Towing (RAM)

DAY

SITUATION
P.D. vessel towing less than 50 m. or more underway tow exceeds 200 m. R.A.M. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Restricted in Ability to Manoeuvre on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

179 Towing (RAM)

DAY

SITUATION
P.D. vessel towing probably 50 m. or more underway tow exceeds 200 m. R.A.M. seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Restricted in Ability to Manoeuvre on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

180 Towing (RAM)

DAY

SITUATION
P.D. vessel towing underway R.A.M. seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and it tow exceeds 200 m. also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this vessel Restricted in Ability to Manoeuvre from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

181 Towing (RAM)

DAY

SITUATION
P.D. vessel towing underway R.A.M. seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line and if tow exceeds 200 m. also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this vessel Restricted in Ability to Manoeuvre from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

182 Towing (RAM)

DAY

SITUATION
P.D. vessel towing underway R.A.M. seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line and if tow exceeds 200 m. also a diamond.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You are overtaking this vessel Restricted in Ability to Manoeuvre from astern. As the overtaking vessel you must keep clear. Sound the appropriate signal and alter course.

191 Dredger

DAY

SITUATION
Dredger / underwater operations less than 50 m. R.A.M. with obstruction on Starboard side making way seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

192 Dredger

DAY

SITUATION
Dredger / underwater operations less than 50 m. R.A.M. with obstruction on port side making way seen end on.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

193 Dredger

DAY

SITUATION
Dredger / underwater operations less than 50 m. R.A.M. with obstruction on port side making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

194 Dredger

DAY

SITUATION
Dredger / underwater operations less than 50 m. R.A.M. with obstruction on Starboard side making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

195 Dredger

DAY

SITUATION
Dredger / underwater operations less than 50 m. R.A.M. with obstruction on Starboard side making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your starboard side. Alter course to starboard to pass around her stern.

196 Dredger

DAY

SITUATION
Dredger / underwater operations less than 50 m. R.A.M. with obstruction on port side making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

197 Dredger

DAY

SITUATION
Dredger / underwater operations probably 50 m. or more R.A.M. with obstruction on port side making way seen end on.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

198 Dredger

DAY

SITUATION
Dredger / underwater operations probably 50 m. or more R.A.M. with obstruction on Starboard side making way seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

199 Dredger

DAY

SITUATION
Dredger / underwater operations probably 50 m. or more R.A.M. with obstruction on port side making way seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

200 Dredger

DAY

SITUATION
Dredger / underwater operations probably 50 m. or more R.A.M. with obstruction on port side making way seen end on.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

201 Dredger

DAY

SITUATION
Dredger probably 50 m. more R.A.M. with obstruction on Starboard side making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your starboard side. Alter course to starboard to pass around her stern.

202 Dredger

DAY

SITUATION
Dredger / underwater operations probably 50 m. more R.A.M. with obstruction on port side making way seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

203 Dredger

DAY

SITUATION
Dredger R.A.M. with obstruction on Starboard side making way seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

204 Dredger

DAY

SITUATION
Dredger R.A.M. with obstruction on port side making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

205 Dredger

DAY

SITUATION
Dredger / underwater operations R.A.M. with obstruction on Starboard side making way seen from astern.

ACTION -- GIVE WAY
Two short blasts alter course to port.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This dredger is on your starboard side but is a special category vessel. Sound two short blasts and alter to port to keep clear.

206 Dredger

DAY

SITUATION
Dredger / underwater operations R.A.M. with obstruction on port side making way seen from astern.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this dredger on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

207 Dredger

DAY

SITUATION
Dredger / underwater operations R.A.M. with obstruction underway but stopped or at anchor.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
Ball, diamond and ball in vertical line. Also two diamonds in vertical line on safe side and two balls in vertical line on obstruction side.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this dredger.

208 Dredger

DAY

SITUATION
a) vessel R.A.M. or dredger / underwater operations without obstruction underway but stopped. b) Small vessel engaged in diving operations.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
a) Ball, diamond and ball in vertical line. b) Rigid flag A.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
Take appropriate action as per the Rules. Sound the appropriate signal and alter course to keep clear of this dredger.

209 Mine Clearance

DAY

SITUATION
Mine clearance vessel less than 50 m. underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

210 Mine Clearance

DAY

SITUATION
Mine clearance vessel less than 50 m. underway seen form Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to port and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

211 Mine Clearance

DAY

SITUATION
Mine clearance vessel less than 50 m. underway seen form port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard. and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

212 Mine Clearance

DAY

SITUATION
Mine clearance vessel probably 50 m. or more underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

213 Mine Clearance

DAY

SITUATION
Mine clearance vessel probably 50 m. or more underway seen from Starboard side.

ACTION -- GIVE WAY
Two short blasts alter course to Starboard and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

214 Mine Clearance

DAY

SITUATION
Mine clearance vessel probably 50 m. or more underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

215 Mine Clearance

DAY

SITUATION
Mine clearance vessel underway seen from astern or less than 50 m. at anchor.

ACTION -- GIVE WAY
One short blast alter course to Starboard and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard. Also it at anchor, a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

216 Mine Clearance

DAY

SITUATION
Mine clearance vessel underway seen from astern or less than 50 m. at anchor.

ACTION -- GIVE WAY
Two short blasts alter course to port and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard. Also it at anchor, a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

217 Mine Clearance

DAY

SITUATION
Mine clearance vessel underway seen from astern or less than 50 m. at anchor.

ACTION -- GIVE WAY
One short blast alter course to Starboard and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard. Also it at anchor, a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

218 Mine Clearance

DAY

SITUATION
Mine clearance vessel probably 50 m. or more but less than 100 m. at anchor, seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard and pass more than 1000 m.

DAY SIGNALS
Three balls - one at foremast head and one at each end of fore yard. Also a ball in fore part.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
This is a mine clearance vessel. You must keep well clear (at least 1000m). Sound the appropriate signal and alter course to pass safely.

219 CBD

DAY

SITUATION
vessel C.B.D. less than 50 m. underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
A Cylinder.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Constrained By Draught end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

220 CBD

DAY

SITUATION
vessel C.B.D. less than 50 m. underway seen from Starboard side.

ACTION -- GIVE WAY
One short blast alter course to Starboard and go round her stern.

DAY SIGNALS
A Cylinder.

FOG SIGNALS
One prolonged and two short blasts. Bottom white light is green side light

WHY?
You see this vessel Constrained By Draught on your starboard side. Alter course to starboard to pass around her stern.

221 CBD

DAY

SITUATION
vessel C.B.D. less than 50 m. underway seen from port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
A Cylinder.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Constrained By Draught on your port side. You are the give-way vessel. Alter course to starboard and pass astern.

222 CBD

DAY

SITUATION
vessel C.B.D. probably 50 m. or more underway seen end on.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
A Cylinder.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Constrained By Draught end-on (head-on situation, Rule 14). Both vessels must alter to starboard. Sound one short blast.

223 CBD

DAY

SITUATION
vessel C.B.D. probably 50 m. or more underway seen from Starboard side.

ACTION -- GIVE WAY
One short blast alter course to Starboard and go round her stern.

DAY SIGNALS
A Cylinder.

FOG SIGNALS
One prolonged and two short blasts.

WHY?
You see this vessel Constrained By Draught on your starboard side. Alter course to starboard to pass around her stern.

224 CBD

DAY

SITUATION
vessel C.B.D. probably 50 m. underway seen port side.

ACTION -- GIVE WAY
One short blast alter course to Starboard.

DAY SIGNALS
A Cylinder.

FOG SIGNALS
One prolonged and two short blasts.
